¹ The count of systems offering local origination and leased access cable channels is underinclusive. If a program or industry guide specifically referred to "local origination" or "leased access," such references were logged under tallies for those generic categories in the "Local/Regional" section at the beginning of each convergence market's cable chart. Many locally originated cable programs, however, were listed by their specific titles in the program guides consulted by Media General's researchers. These programs were then listed in the cable charts under the program titles. Nonetheless, these shows usually represent "local origination" or "leased access" programming, even though they were charted separately and not included in the totals listed above.

² According to FCC Form 346 (Section III, Question 4) on file with the FCC

³ The overall number of Class A Stations increased because the FCC granted the pending applications for Class A status for WRKV-LP, Roanoke, VA and WKPZ-LP, Whytheville, VA. The overall number of non-class A LPTV stations decreased because of the reclassification of WRKV-LP and WKPZ-LP; it also decreased because of the deletion of several of the non-Class A LPTV construction permits which were mistakenly included in the same chart in Media General's comments in the *2001 Proceeding*. The number of non-Class A LPTV station owners also decreased as a result of these changes.
